Abstracts

Tumor Necrosis Factor Receptor Superfamily Member 16 - Pipeline Review, H1 2020

SUMMARY

Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) pipeline Target constitutes close to 7 molecules. The latest report Tumor Necrosis Factor Receptor Superfamily Member 16 - Pipeline Review, H1 2020, outlays comprehensive information on the Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) targeted therapeutics, complete with analysis by indications, stage of development, mechanism of action (MoA), route of administration (RoA) and molecule type.

Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) - Tumor necrosis factor receptor superfamily member 16 plays a role in the regulation of the translocation of GLUT4 to the cell surface in adipocytes and skeletal muscle cells in response to insulin, probably by regulating RAB31 activity, and thereby contributes to the regulation of insulin-dependent glucose uptake. Low affinity receptor which can bind to NGF, BDNF, NT-3, and NT-4.

The molecules developed by companies in Phase II, Phase I and Preclinical stages are 3, 1 and 3 respectively. Report covers products from therapy areas Central Nervous

System, Cardiovascular, Metabolic Disorders, Ophthalmology and Toxicology which include indications Alzheimer's Disease, Traumatic Brain Injury, Chemotherapy Induced Peripheral Neuropathy, Diabetic Neuropathic Foot Ulcers, Huntington Disease, Inflammatory Pain, Ischemic Stroke, Keratoconjunctivitis Sicca (Dry Eye), Open-Angle Glaucoma, Osteoarthritis Pain, Retinitis Pigmentosa (Retinitis), Spinal Cord Injury and Tauopathies.

Furthermore, this report also reviews key players involved in Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) targeted therapeutics development with respective active and dormant or discontinued projects. Driven by data and information sourced from proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources.

Note: Certain content/sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

SCOPE

The report provides a snapshot of the global therapeutic landscape for Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR)

The report reviews Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) targeted therapeutics under development by companies and universities/research institutes based on information derived from company and industry-specific sources

The report covers pipeline products based on various stages of development ranging from pre-registration till discovery and undisclosed stages

The report features descriptive drug profiles for the pipeline products which includes, product description, descriptive MoA, R&D brief, licensing and collaboration details & other developmental activities

The report reviews key players involved in Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) targeted therapeutics and enlists all their major and minor projects

The report assesses Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) targeted therapeutics based on mechanism of action (MoA), route of administration (RoA) and molecule type

The report summarizes all the dormant and discontinued pipeline projects

The report reviews latest news and deals related to Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) targeted therapeutics

REASONS TO BUY

Gain strategically significant competitor information, analysis, and insights to formulate effective R&D strategies

Identify emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage

Identify and understand the targeted therapy areas and indications for Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR)

Identify the use of drugs for target identification and drug repurposing

Identify potential new clients or partners in the target demographic

Develop strategic initiatives by understanding the focus areas of leading

companies

Plan mergers and acquisitions effectively by identifying key players and it's most promising pipeline therapeutics

Devise corrective measures for pipeline projects by understanding Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) development landscape

Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope

Contents

Introduction

Global Markets Direct Report Coverage

Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) - Overview

Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) - Therapeutics Development

Products under Development by Stage of Development

Products under Development by Therapy Area

Products under Development by Indication

Products under Development by Companies

Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) - Therapeutics Assessment

Assessment by Mechanism of Action

Assessment by Route of Administration

Assessment by Molecule Type

Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) - Companies Involved in Therapeutics Development

Chiesi Farmaceutici SpA

Dompe Farmaceutici SpA

Levixcept Ltd

Pharmatrophix Inc

Protheragen Inc

Tetraneuron SL

Tiantai Medical Technology Pty Ltd

Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) - Drug Profiles

cenegermin - Drug Profile

Tumor Necrosis Factor Receptor Superfamily Member 16 (Low Affinity Neurotrophin Receptor p75NTR or Low Affinity Nerve Growth Factor Receptor or Gp80 LNGFR or p75 ICD or TNFRSF16 or CD271 or NGFR) - Product Development Milestones

Featured News & Press Releases

Jun 25, 2019: Domp? announces first patient enrollment in phase 2b clinical trial investigating novel mechanism of action in moderate to severe dry eye disease

Mar 12, 2019: Domp? receives Industry Innovation Award from the National Organization for Rare Disorders for the development of Oxervate eye drops (cenegermin-bkbj), for neurotrophic keratitis

Jan 03, 2019: Dompe announces first treatment with Oxervate eye drops (cenegermin-bkbj), for neurotrophic keratitis

Aug 24, 2018: Domp?'s Oxervate gets approval to treat neurotrophic keratitis in US

Jun 04, 2018: Study Finds Experimental Drug Restores some Bladder Function after Spinal Cord Injury

Sep 14, 2017: Leviccept Starts First-in-Human Phase I Trial of LEVI-04, A Novel Fusion Protein Therapy for Chronic Pain

Jul 20, 2017: Cenegermin Eye Drops Receive European Union Approval: The First Biotechnological Drug Resulting from Dompe Research for the Treatment of Moderate to Severe Neurotrophic Keratitis is Made in Italy

Jul 10, 2017: Dompe Farmaceutici Receives EU marketing authorisation For OXERVATE

May 23, 2017: Dompe Receives Positive CHMP Opinion in Europe For Oxervate (Cenegermin Eye Drops) For the Treatment of Adult Patients with Moderate or Severe Neurotrophic Keratitis

May 19, 2017: The European Medicines Agency: New medicine for rare eye disease

Dec 12, 2016: EMA Validates the Marketing Authorisation Application for Cenegermin Eye Drops (Oxervate) Submitted by Domp?

Dec 02, 2015: rhNGF, the Dompe Biotech Molecule for the Treatment of Neurotrophic Keratitis, Receives Orphan Drug Designation from the European Medicines Agency

Nov 22, 2014: Italian research at the SOI Congress: focus on therapeutic prospects of NGF, the innovative molecule developed on the basis of the studies by Rita Levi Montalcini in ophthalmology

Sep 25, 2014: EuCornea: Dompe wins the "Best Poster Award" for its preliminary data concerning the use of rhNGF in the treatment of neurotrophic keratitis

Jul 23, 2014: Dompe announces the Food and Drug Administration has granted orphan drug designation to its rhNGF-based treatment for neurotrophic keratitis
