Abstracts

PDF Price: US\$ 450.00

Print Price: US\$ 495.00

Report Overview

China suppliers of batteries are strengthening R&D and increasing production to meet broadening requirements and secure a larger customer base. The country accounts for more than 50 percent of global output for the line, a share expected to rise further in the years ahead.

To match this lead in terms of technology, makers continue to enhance their selections based on trends in traditional uses while targeting emerging ones. The last includes the fast-growing solar and wind power segments. Efforts cover upgrading product performance and exploring new materials and designs.

This report covers the major products of China's batteries industry, namely lithium, lead-acid, NiCd and solar cells and panels.

What you'll get

In-depth profiles of 36 verified suppliers with a comprehensive look at their manufacturing and export capability, product and market focus, verified contact details, and more

90 full-color images that depict popular battery export models, with detailed product descriptions and minimum order requirements

Verified supplier contact details of an additional 30 exporters, including names, e-mails, telephone numbers and websites

Supplier information in tabular format to help you compare companies at a glance

Results of the custom-designed supplier survey, which forecasts industry trends for the next 12 months

An extensive overview of the industry discussing the main challenges facing suppliers

An in-depth examination of the supplier base highlighting key characteristics of different types of companies

Details of the primary production centers

An update of the latest trends in design, R&D, materials and components

A review of the key factors that influence the price and quality of low-end, midrange and high-end products

Comprehensive pricing tables featuring export price ranges
