Abstracts

Belgium And Netherlands B2B Hygiene Paper Market, valued at USD 1.08 billion in 2023, is projected to experience a growth rate of over 5.5% annually from 2024 to 2032. Both Belgium and the Netherlands are key players within the European Union, benefiting from strong and stable economies. With GDP per capita surpassing \$44, 000 for Belgium and \$50, 000 for the Netherlands, these nations have cultivated favorable environments for business growth. As a result, their B2B sectors, particularly in hygiene products, are essential to maintaining operational and professional standards across numerous industries. As the global economy recovers, the demand for hygiene products is increasing due to expanding corporate activities and a rise in employment across both nations.

The market can be divided into several product categories, including toilet paper, facial tissues, paper towels, napkins, and wet wipes. Toilet paper, a crucial hygiene product, generated approximately USD 383 million in 2023 and is expected to grow at a compound annual growth rate (CAGR) of 5.8% from 2024 to 2032. Toilet paper is an indispensable item across multiple sectors, such as corporate offices, healthcare institutions, educational facilities, hospitality, and retail businesses. Its constant usage in high-traffic areas like public restrooms and commercial venues ensures steady demand for this essential product. The B2B market for hygiene paper in Belgium and the Netherlands continues to grow, driven by a significant need for toilet paper in various environments.

In terms of application, the market is divided into corporate offices, healthcare facilities, hospitality, institutions, office buildings, and retail spaces. The corporate segment represented approximately 19% of the total market share in 2023 and is anticipated to

grow at a CAGR of 5.7% during the forecast period. In corporate environments, maintaining high hygiene standards is essential for employee well-being, comfort, and productivity. Businesses rely on hygiene products like toilet paper, facial tissues, and paper towels to ensure clean restrooms and common areas. In healthcare facilities, hygiene paper products are critical for maintaining sanitary conditions and controlling the spread of infections, ensuring patient care is met with the highest hygiene standards.

The Netherlands holds the largest share of the market, accounting for roughly 63% of the total. Toilet paper is widely used across multiple sectors, including corporate, healthcare, hospitality, and educational institutions. The variety of toilet paper products available allows businesses to meet different needs, from budget-friendly single-ply options to more luxurious multi-ply varieties. This range of products caters to both cost-effective requirements and premium market demands, ensuring consistent demand across the region.
