Abstracts

The Global Drug Discovery Informatics Market, valued at USD 3.5 billion in 2024, is projected to grow at an impressive CAGR of 11.5% between 2025 and 2034. This rapid expansion is fueled by escalating investments in research and development across pharmaceutical and biotechnology sectors, with a particular focus on advancing treatments in oncology, infectious diseases, and personalized medicine.

The rising prevalence of chronic conditions and the increasing emphasis on precision medicine are driving the adoption of innovative informatics tools that streamline drug discovery processes, improve efficiency, and facilitate groundbreaking therapies. The shift toward personalized treatment approaches, underpinned by advancements in genetic and molecular profiling, is further amplifying the demand for sophisticated informatics solutions. These technologies play a pivotal role in identifying biomarkers, enabling patient stratification, and enhancing outcomes in drug development. As the pharmaceutical industry continues to prioritize efficiency and innovation, the market is expected to maintain a robust growth trajectory.

Investments in R&D have significantly boosted the adoption of informatics platforms designed to optimize workflows in drug discovery. With pharmaceutical companies channeling substantial resources into developing cutting-edge therapies, informatics tools are becoming indispensable in managing complex processes such as target identification, lead optimization, and clinical data integration. The ability of these platforms to analyze large datasets, integrate multi-omics data, and support precision medicine initiatives is transforming the drug discovery landscape. These advancements enable the development of patient-specific treatments, addressing the growing global demand for personalized healthcare solutions.

The market is segmented by product type into software and services, with the software segment dominating at USD 2.2 billion in 2024. Software solutions are integral to modern drug discovery, managing intricate processes, and analyzing extensive datasets. Their critical role in supporting precision medicine, which requires detailed genomic, proteomic, and clinical data analysis, underscores their growing importance. These tools empower researchers to uncover patient-specific insights and accelerate the development of innovative therapies, further driving market growth.

By functionality, the market includes sequencing and target data analysis, docking, molecular modeling, and others. In 2024, sequencing and target data analysis captured 42.5% of the market share, highlighting its transformative impact on genomic and epigenomic research. Next-generation sequencing (NGS) and high-throughput technologies have revolutionized the identification of genetic variations, offering critical insights into novel drug targets. These advancements are enhancing the efficiency of drug development and paving the way for more precise and effective treatments.

The United States remains a dominant player in the drug discovery informatics market, achieving USD 1.4 billion in 2024. The country's leadership stems from its high prevalence of chronic diseases and extensive investments in drug discovery innovation. Government initiatives and robust private funding are propelling advancements in personalized medicine, genomics, and biologics. The focus on tailoring treatments to individual genetic profiles continues to drive demand for advanced informatics tools, solidifying the US as a hub for drug discovery advancements.

Contents

CHAPTER 1 METHODOLOGY AND SCOPE

- 1.1 Market scope and definition
- 1.2 Research design
 - 1.2.1 Research approach
 - 1.2.2 Data collection methods
- 1.3 Base estimates and calculations
 - 1.3.1 Base year calculation
 - 1.3.2 Key trends for market estimation
- 1.4 Forecast model
- 1.5 Primary research and validation
 - 1.5.1 Primary sources
 - 1.5.2 Data mining sources

CHAPTER 2 EXECUTIVE SUMMARY

- 2.1 Industry 360° synopsis

CHAPTER 3 INDUSTRY INSIGHTS

- 3.1 Industry ecosystem analysis
- 3.2 Industry impact forces
 - 3.2.1 Growth drivers
 - 3.2.1.1 Increasing demand for personalized medicine
 - 3.2.1.2 Rising research and development investments in drug discovery
 - 3.2.1.3 Growing prevalence of chronic disease
 - 3.2.1.4 Technological advancement in cloud computing and AI
 - 3.2.2 Industry pitfalls and challenges
 - 3.2.2.1 High cost of informatics tools and implementation
 - 3.2.2.2 Complexity of data integration and management
- 3.3 Growth potential analysis
- 3.4 Regulatory landscape
- 3.5 Porter's analysis
- 3.6 PESTEL analysis

CHAPTER 4 COMPETITIVE LANDSCAPE, 2024

- 4.1 Introduction
- 4.2 Company market share analysis
- 4.3 Competitive analysis of major market players
- 4.4 Competitive positioning matrix
- 4.5 Strategy dashboard

CHAPTER 5 MARKET ESTIMATES AND FORECAST, BY PRODUCT TYPE, 2021 – 2034 (\$ MN)

- 5.1 Key trends
- 5.2 Software
- 5.3 Services

CHAPTER 6 MARKET ESTIMATES AND FORECAST, BY FUNCTIONALITY, 2021 – 2034 (\$ MN)

- 6.1 Key trends
- 6.2 Sequencing and target data analysis
- 6.3 Docking
- 6.4 Molecular modeling
- 6.5 Other functionalities

CHAPTER 7 MARKET ESTIMATES AND FORECAST, BY APPLICATION, 2021 – 2034 (\$ MN)

- 7.1 Key trends
- 7.2 Drug discovery
- 7.3 Drug development

CHAPTER 8 MARKET ESTIMATES AND FORECAST, BY END USE, 2021 – 2034 (\$ MN)

- 8.1 Key trends
- 8.2 Pharmaceutical and biotechnology companies
- 8.3 Contract research organizations (CROs)
- 8.4 Academic and research institutes
- 8.5 Other end users

CHAPTER 9 MARKET ESTIMATES AND FORECAST, BY REGION, 2021 – 2034 (\$

MN)

9.1 Key trends

9.2 North America

9.2.1 U.S.

9.2.2 Canada

9.3 Europe

9.3.1 Germany

9.3.2 UK

9.3.3 France

9.3.4 Spain

9.3.5 Italy

9.3.6 Netherlands

9.4 Asia Pacific

9.4.1 China

9.4.2 India

9.4.3 Japan

9.4.4 Australia

9.4.5 South Korea

9.5 Latin America

9.5.1 Brazil

9.5.2 Mexico

9.5.3 Argentina

9.6 Middle East and Africa

9.6.1 South Africa

9.6.2 Saudi Arabia

9.6.3 UAE

CHAPTER 10 COMPANY PROFILES

10.1 Accenture

10.2 Agilent Technologies

10.3 Albany Molecular Research

10.4 Boehringer Ingelheim International

10.5 Charles River Laboratories

10.6 Collaborative Drug Discovery

10.7 Eurofins Scientific

10.8 Illumina

10.9 Jubilant Life Sciences

10.10 Novo Informatics
10.11 Oracle Corporation
10.12 Selvita

I would like to order

Product name: Drug Discovery Informatics Market Opportunity, Growth Drivers, Industry Trend Analysis, and Forecast 2025 – 2034

Product link: <https://marketpublishers.com/r/DAB83BD128FDEN.html>

Price: US\$ 4,850.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/DAB83BD128FDEN.html>
