## Abstracts

The Global Event Logistics Market, valued at USD 72.3 billion in 2024, is projected to grow at a CAGR of 5.8% from 2025 to 2034. This growth is driven by the increasing number of both local and international events as global economies continue to expand. The demand for logistics services spans various events, including trade shows, corporate conferences, exhibitions, sports tournaments, music festivals, and more.

The market is segmented by service type, which includes transportation, warehousing and storage, inventory management, logistics planning, and coordination, among others. In 2024, transportation accounted for 35% share and is expected to grow to USD 35 billion by 2034. This growth is fueled by the rising scale and complexity of major events. Large-scale gatherings, such as sports tournaments and music festivals, require intricate transportation solutions to manage the movement of equipment, staging, and materials. These logistics often involve tight schedules and precise coordination to ensure the timely delivery of everything from sound equipment to lighting and temporary infrastructure. Technologies like real-time tracking and route optimization also improve the efficiency and transparency of event transportation.

In terms of application, the event logistics market is divided into corporate events, sports events, entertainment events, public events, and private events. Among these, the entertainment events segment held the largest share of 38% in 2024. As entertainment events, such as concerts and music festivals, gain popularity—especially among younger audiences—the demand for logistics support has increased. These events often require complex setups, including the transport of sound systems, lighting rigs, staging, and temporary facilities, all of which must be managed efficiently.

North America is the leading region in the global event logistics market, holding a 35%

share in 2024, with the U.S. being the largest contributor. The region has a high demand for logistics solutions for corporate events, trade shows, and exhibitions. As the number of international exhibitors and attendees at major events continues to grow, the need for reliable logistics services to transport materials and set up venues has surged.

As the event logistics market continues to expand, the demand for innovative and efficient logistics solutions will be crucial to supporting the smooth execution of various events worldwide.
