## **Abstracts**

The Global Fitness Platforms For Disabled Market was valued at USD 2.1 billion in 2023 and is estimated to grow at 19.4% CAGR from 2024 to 2032. The rising number of people with disabilities and the surge in telehealth are driving the market. These platforms not only enhance physical fitness but also support mental well-being, mobility, and independence, making them essential for improving the quality of life for people with disabilities. As the number of individuals seeking adaptive fitness solutions grows, these platforms are expected to expand globally, catering to an increasingly diverse and underserved market segment.

Based on platform, the market is segmented into Android, iOS, and other platforms. The Android segment dominated the market in 2023 and accounted for USD 1 billion. Android devices are typically more affordable and available across a broader range of price points, making them accessible to a larger, diverse population, including people with disabilities who may have budget constraints. Additionally, Android's open-source nature allows developers to create highly customizable and adaptive fitness applications suited to specific accessibility needs, such as voice commands, screen magnifiers, and gesture-based controls. Moreover, Android's compatibility with a wide array of devices, including wearables and tablets, expands its usability for adaptive fitness solutions.

Based on device, the fitness platforms for disabled market is segmented into smartphones, tablets, and wearable devices. The smartphones segment is anticipated to reach USD 4.3 billion by 2032. Smartphones are widely used and easily accessible, allowing individuals with disabilities to carry a versatile fitness tool that fits in their pockets. They offer a range of features, including touchscreens, voice recognition, and built-in sensors, which enhance usability and make it easier for users to engage with

adaptive fitness applications.

U.S. dominated the North America fitness platforms for disabled market with the largest revenue of USD 754.3 million in 2023. There is a growing emphasis on developing accessible digital platforms that cater to all user abilities, supported by federal initiatives and advocacy for disabled rights. Additionally, with the increasing prevalence of disability in the U.S., there is a high demand for fitness solutions that support adaptive exercises and wellness goals.
