Abstracts

Italy Asphalt Mixing Plants Market was valued at USD 74.1 million in 2023 and is projected to grow at a CAGR of 4.3% from 2024 to 2032. Mobile asphalt mixing plants are becoming increasingly popular in Italy. Their versatility and ease of relocation make them ideal for projects ranging from minor road repairs to large-scale infrastructure endeavors. By reducing the need for long-distance asphalt transportation, these mobile plants not only boost operational efficiency but also lead to significant cost savings. This trend is gaining momentum, driven by the Italian construction sector's rising demand for flexible and adaptable solutions, further fueling market growth.

The stationary segment dominated the market in 2023, generating USD 30.3 million in revenue, and is expected to reach USD 44.8 million by 2032. Stationary asphalt mixing plants consistently produce large quantities of asphalt, essential for extensive, long-term infrastructure projects. These plants offer high output and better control over the mixing process, making them suitable for major construction projects like highways, airports, and urban developments. Their robust construction allows continuous operation without frequent relocation, ensuring reliability for projects requiring steady asphalt production over extended periods. Advanced technologies in these stationary plants produce high-quality asphalt that meets stringent standards for large-scale infrastructure work in Italy. In 2023, the 50-150 T/H segment held a market share of approximately 56%. Asphalt mixing plants with a capacity of 50-150 T/H lead the market in Italy due to their balanced production capacity and flexibility. This range is ideal for medium and large infrastructure projects like road construction and urban development, which require substantial asphalt quantities without excessive operational costs. These plants efficiently meet the asphalt needs of various projects, providing sufficient output. The 50-150 T/H plants can handle both continuous and batch processing, catering to different construction requirements across Italy. Government investments in

infrastructure projects, supported by European Union funding, are driving the demand for these plants as road networks expand and require more maintenance. Urbanization and population growth increase the need for improved road infrastructure. New technologies in asphalt mixing, such as recycling and sustainable practices, comply with environmental regulations and enhance efficiency, making these plants more attractive. The necessity to repair and upgrade aging roads, along with supportive government policies, also contributes to market growth. Economic recovery and private sector investments in infrastructure projects further expand the market. These factors collectively create a robust and evolving asphalt mixing plants market in Italy.

Contents

Report Content

CHAPTER 1 METHODOLOGY & SCOPE

- 1.1 Market scope & definition
- 1.2 Base estimates & calculations
- 1.3 Forecast calculation
- 1.4 Data sources
 - 1.4.1 Primary
 - 1.4.2 Secondary
 - 1.4.2.1 Paid sources
 - 1.4.2.2 Public sources

CHAPTER 2 EXECUTIVE SUMMARY

- 2.1 Market 360° synopsis, 2018 - 2032
- 2.2 Business trends
- 2.3 Regional trends
- 2.4 Product type trends
- 2.5 Mode of operation trends
- 2.6 Distribution Channel trends

CHAPTER 3 MARKET INSIGHTS

- 3.1 Industry ecosystem analysis
- 3.2 Key news and initiatives
 - 3.2.1 Partnership/Collaboration
 - 3.2.2 Merger/Acquisition
 - 3.2.3 Investment
 - 3.2.4 Product launch & innovation
- 3.3 Regulatory landscape
- 3.4 Impact forces
- 3.5 Growth drivers
 - 3.5.1 Rising infrastructure development projects
 - 3.5.2 Urbanization and population growth
 - 3.5.3 Maintenance and rehabilitation projects
- 3.6 Industry pitfalls & challenges

- 3.6.1 Regulatory compliances
- 3.6.2 Market volatility
- 3.7 Growth potential analysis
- 3.8 Raw material analysis
- 3.9 Trade analysis
 - 3.9.1 Export Data
 - 3.9.2 Import Data
- 3.10 Porter's analysis
- 3.11 PESTEL analysis

CHAPTER 4 COMPETITIVE LANDSCAPE, 2023

- 4.1 Introduction
- 4.2 Company market share, 2023
- 4.3 Competitive analysis of major market players, 2023
- 4.4 Competitive positioning matrix, 2023
- 4.5 Strategic outlook matrix, 2023

CHAPTER 5 MARKET ESTIMATES & FORECAST, BY TYPE 2018 – 2032, (USD MILLION) (MILLION UNITS)

- 5.1 Key trends
- 5.2 Recycled
- 5.3 Mobile
- 5.4 Stationary
- 5.5 Batch

CHAPTER 6 MARKET ESTIMATES & FORECAST, BY CAPACITY TYPE 2018 – 2032, (USD MILLION) (MILLION UNITS)

- 6.1 Key trends
- 6.2 Below 50T/H
- 6.3 50-150T/H
- 6.4 150-300T/H
- 6.5 Above 300T/H

CHAPTER 7 MARKET ESTIMATES & FORECAST, BY REGION 2018 – 2032, (USD MILLION) (MILLION UNITS)

7.1 Key trends

7.2 Europe

7.2.1 Italy

CHAPTER 8 COMPANY PROFILES

8.1 Ammann Italy S.r.l.

8.2 BENNINGHOVEN TBA 4000

8.3 Bernardi Impianti S.r.l.

8.4 Ciber Equipamentos Rodoviaros S.A

8.5 E.T. Clancy Company

8.6 Fazzini Meccanica

8.7 LINTEC & LINNHOFF HOLDINGS PTE LTD.

8.8 MARINI - FAYAT GROUP

8.9 NIKKO Co., Ltd.

8.10 SANY Group

8.11 Sigma asphalt technologies

8.12 SIMEM S.p.A.

8.13 SuniverseTech

8.14 Teka

8.15 WIRTGEN GROUP
