Abstracts

North America DC Microgrid Market was valued at USD 1.8 billion in 2023 and is forecasted to expand at a CAGR of 10.4% from 2024 to 2032. This energy system leverages direct current (DC) to efficiently manage and distribute electricity generated from renewable sources, energy storage, and DC-powered devices within a specific area. By supporting the seamless integration of renewable energy technologies, DC microgrids allow for direct energy storage and usage without converting it to alternating current (AC), enhancing overall system efficiency. The growing frequency of extreme weather events and natural disasters has emphasized the need for resilient energy solutions. DC microgrids, which can operate independently of the primary grid, are increasingly preferred for their ability to provide backup power during outages. This increased resilience drives adoption across various sectors. Additionally, rising investments in innovative energy storage technologies, including advanced batteries and control systems, are enhancing the feasibility and attractiveness of DC microgrids. The market is segmented by connectivity, with the off-grid segment projected to surpass USD 1.2 billion by 2032. Off-grid DC microgrids, which operate independently, are particularly advantageous in remote or underserved areas with limited or unreliable access to the primary grid. Increased investments in rural electrification are also fueling growth, as off-grid systems provide dependable power for critical facilities. Moreover, their simpler design and compatibility with renewable sources contribute to their popularity. In terms of storage devices, the flywheel segment of the DC microgrid market is expected to grow at a CAGR exceeding 11% through 2032. Flywheel energy storage offers high round-trip efficiency, typically between 85% and 95%, making it suitable for applications that require brief, high-power energy bursts. As industries seek long-lasting and environmentally friendly storage solutions, the adoption of flywheels is anticipated to increase. The U.S. market for DC microgrids is poised to exceed USD 3.5

billion by 2032, driven by the demand for reliable power solutions. Increased focus on cost-effective energy management across commercial, industrial, and residential sectors is boosting adoption. Supportive federal and state policies promoting clean energy and advanced grid technologies also encourage growth. The shift towards sustainable energy practices is accelerating interest in DC microgrids, which primarily operate on renewable sources. Community involvement in the development and operation of these systems is growing, as local stakeholders recognize the benefits of enhanced resilience and energy resource ownership. Continuous investments in smart technologies and energy storage innovations will further drive development, positively impacting the market outlook.

Contents

Report Content

CHAPTER 1 METHODOLOGY & SCOPE

- 1.1 Research design
- 1.2 Base estimates & calculations
- 1.3 Forecast model
- 1.4 Primary research & validation
 - 1.4.1 Primary sources
 - 1.4.2 Data mining sources
- 1.5 Market definitions

CHAPTER 2 INDUSTRY INSIGHTS

- 2.1 Industry ecosystem
- 2.2 Regulatory landscape
- 2.3 Industry impact forces
 - 2.3.1 Growth drivers
 - 2.3.2 Industry pitfalls & challenges
- 2.4 Growth potential analysis
- 2.5 Porter's analysis
 - 2.5.1 Bargaining power of suppliers
 - 2.5.2 Bargaining power of buyers
 - 2.5.3 Threat of new entrants
 - 2.5.4 Threat of substitutes
- 2.6 PESTEL analysis

CHAPTER 3 COMPETITIVE LANDSCAPE, 2023

- 3.1 Introduction
- 3.2 Strategic dashboard
- 3.3 Innovation & sustainability landscape

CHAPTER 4 MARKET SIZE AND FORECAST, BY CONNECTIVITY, 2021 – 2032 (USD BILLION & MW)

- 4.1 Key trends

4.2 Grid connected

4.3 Off grid

CHAPTER 5 MARKET SIZE AND FORECAST, BY POWER SOURCE, 2021 – 2032 (USD BILLION & MW)

5.1 Key trends

5.2 Diesel generators

5.3 Natural gas

5.4 Solar PV

5.5 CHP

5.6 Others

CHAPTER 6 MARKET SIZE AND FORECAST, BY STORAGE DEVICE, 2021 – 2032 (USD BILLION & MW)

6.1 Key trends

6.2 Lithium-ion

6.3 Lead acid

6.4 Flow battery

6.5 Flywheels

6.6 Others

CHAPTER 7 MARKET SIZE AND FORECAST, BY APPLICATION, 2021 – 2032 (USD BILLION & MW)

7.1 Key trends

7.2 Healthcare

7.3 Educational institutes

7.4 Military

7.5 Utility

7.6 Industrial/Commercial

7.7 Remote

7.8 Others

CHAPTER 8 MARKET SIZE AND FORECAST, BY COUNTRY, 2021 – 2032 (USD BILLION & MW)

8.1 Key trends

8.2 U.S.

8.3 Canada

8.4 Mexico

CHAPTER 9 COMPANY PROFILES

9.1 ABB

9.2 Enel X

9.3 Eaton Corporation

9.4 Hitachi Energy

9.5 PowerSecure

9.6 PG&E

9.7 Schneider Electric

9.8 SolarWorX

9.9 Sumitomo Electric Industries

9.10 Schaltbau Group

9.11 Weidmuller
