## Abstracts

The Global Outboard Boats Engine Market was valued at USD 10.3 billion in 2024 and is estimated to grow at a CAGR of 5.9% to reach USD 17.6 billion by 2034.

Demand continues to rise as recreational boating and water-based activities gain popularity across coastal and inland regions. Higher consumer spending on leisure equipment, along with expanding marina infrastructure and tourism development, is accelerating the adoption of outboard engines throughout the forecast timeline. The market is also advancing as manufacturers introduce lighter, more fuel-efficient, and lower-emission technologies suitable for both commercial operations and recreational boating. Transitioning toward four-stroke systems and direct fuel-injection designs is strengthening long-term growth, particularly as emission standards continue to tighten. Growing dependence on reliable outboard engines for commercial fishing, small-scale marine transport, and coastal logistics is reinforcing demand for advanced, high-performance models. Rising investments in coastal development, along with expanding artisanal and aquaculture activities, are also enhancing opportunities for engine suppliers and supporting a steady market outlook.

The seagoing segment held a 56% share in 2024 and is expected to grow at a CAGR above 5.9% through 2034. Interest in coastal travel, offshore excursions, and water-sport activities is boosting the utilization of seagoing outboard engines designed for high durability, long-distance travel, and stronger offshore capabilities. Their growing use in marine security operations and commercial transport is further driving adoption due to their fast response and dependable performance.

The leisure segment held a 62% share in 2024 and is projected to grow at a CAGR of

5% from 2025 to 2034. Rising enthusiasm for recreational boating, family outings, and weekend water activities continues to elevate demand for outboard engines across small and mid-sized boats. Higher disposable income, urban lifestyle trends, and expanding participation in marine recreation are fueling sales across lakes, coasts, and river systems.

US Outboard Boats Engine Market held an 86% share and generated USD 3.57 billion in 2024. Recreational boating remains highly active due to strong consumer purchasing power and a rapidly growing marina network. Demand for fishing boats, personal watercraft, and leisure vessels continues to rise across saltwater and freshwater environments. Manufacturers in the US are focusing on technologically enhanced four-stroke and digitally controlled outboard engines that deliver improved fuel economy, lower emissions, and smoother handling.

Major companies in the Global Outboard Boats Engine Market include Brunswick, Oxe Marine, Yamaha, Honda, Suzuki Motor, Cox Powertrain, Parsun Power Machine, Hidea Power, Volvo Penta, and Tohatsu. Companies in the Outboard Boats Engine Market are reinforcing their market position by developing engines with higher fuel efficiency, reduced emissions, and lightweight construction to meet shifting consumer and regulatory expectations. Many firms are investing in digital control systems and advanced diagnostics to elevate performance and simplify maintenance for end users. Strategic collaborations with boat manufacturers help expand distribution networks and secure long-term OEM partnerships. Firms are also enhancing their production capabilities to meet growing demand for four-stroke and high-horsepower engines.
