Abstracts

Russia Monoclonal Antibodies Market was valued at approximately USD 2.5 billion in 2023 and is expected to experience a compound annual growth rate (CAGR) of 13.3% from 2024 to 2032. Monoclonal antibodies (mAbs) are laboratory-engineered molecules designed to act as artificial antibodies, binding to specific antigens, often proteins on cell surfaces, with high precision. These antibodies are derived from identical immune cells cloned from a single parent, ensuring uniform targeting of the same antigen.

One of the key factors driving the market's growth is the rising incidence of chronic and infectious diseases in Russia. Chronic diseases, especially cardiovascular conditions, continue to be a significant health burden in the country, contributing heavily to mortality rates. This increasing prevalence of diseases highlights the need for more advanced and targeted therapies, including monoclonal antibodies, to improve patient outcomes.

The market is divided into several types of monoclonal antibodies, including humanized, fully human, chimeric, and others. The humanized monoclonal antibody segment held the largest share of 48.4% in 2023 and is expected to grow substantially in the coming years. Humanization involves replacing most of a mouse antibody's structure with human components while preserving its ability to bind specific antigens. This makes humanized antibodies highly effective in treating a range of conditions like cancer, autoimmune disorders, and infectious diseases, with reduced risks of immune reactions.

In Russia, local manufacturers have focused heavily on developing biosimilars of humanized monoclonal antibodies, contributing to the growth of this segment. The country's increasing healthcare investments and growing emphasis on personalized medicine also fuel the demand for these sophisticated therapies.

The application segment of the market is dominated by oncology, with this area holding a significant share of 39.1% in 2023. Monoclonal antibodies are gaining traction in cancer treatment due to their targeted therapeutic effects. These antibodies help by binding to specific markers on cancer cells, either inhibiting tumor growth, triggering cell death, or enhancing the body's immune system to fight cancer more effectively.

In terms of end users, hospitals dominate the market with a share of 52% in 2023. Hospitals are central to the distribution and use of monoclonal antibodies, utilizing them for both diagnostic and treatment purposes. The reliance on these antibodies for various medical procedures, such as blood typing and organ transplant matching, is increasing, further driving the demand for monoclonal antibodies in healthcare settings.

Public procurement of biologics, including monoclonal antibodies, makes up a significant portion of Russia's overall medicine procurement, further boosting the market's growth. This trend, combined with the growing demand for advanced medical therapies, is expected to continue fueling the monoclonal antibody market in Russia.

Contents

Report Content

CHAPTER 1 METHODOLOGY & SCOPE

- 1.1 Market scope & definitions
- 1.2 Research design
 - 1.2.1 Research approach
 - 1.2.2 Data collection methods
- 1.3 Base estimates & calculations
 - 1.3.1 Base year calculation
 - 1.3.2 Key trends for market estimation
- 1.4 Forecast model
- 1.5 Primary research and validation
 - 1.5.1 Primary sources
 - 1.5.2 Data mining sources

CHAPTER 2 EXECUTIVE SUMMARY

- 2.1 Industry 360° synopsis

CHAPTER 3 INDUSTRY INSIGHTS

- 3.1 Industry ecosystem analysis
- 3.2 Industry impact forces
 - 3.2.1 Growth drivers
 - 3.2.1.1 Increasing government focus on localizing pharmaceutical production
 - 3.2.1.2 Increasing prevalence of chronic and infectious diseases
 - 3.2.1.3 Rising investment in healthcare infrastructure and research
 - 3.2.2 Industry pitfalls & challenges
 - 3.2.2.1 Lack of a comprehensive regulatory framework for biosimilars and biologicals
 - 3.2.2.2 High costs associated with monoclonal antibody production and procurement
- 3.3 Growth potential analysis
- 3.4 Regulatory landscape
- 3.5 Pipeline analysis
- 3.6 Future market trends
- 3.7 Porter's analysis
- 3.8 PESTEL analysis

CHAPTER 4 COMPETITIVE LANDSCAPE, 2023

- 4.1 Introduction
- 4.2 Company matrix analysis
- 4.3 Competitive analysis of major market players
- 4.4 Competitive positioning matrix
- 4.5 Strategy dashboard

CHAPTER 5 MARKET ESTIMATES AND FORECAST, BY TYPE, 2021 – 2032 (\$ MN)

- 5.1 Key trends
- 5.2 Humanized
- 5.3 Fully human
- 5.4 Chimeric
- 5.5 Other types

CHAPTER 6 MARKET ESTIMATES AND FORECAST, BY APPLICATION, 2021 – 2032 (\$ MN)

- 6.1 Key trends
- 6.2 Oncology
- 6.3 Autoimmune diseases
- 6.4 Infectious diseases
- 6.5 Other applications

CHAPTER 7 MARKET ESTIMATES AND FORECAST, BY END USE, 2021 – 2032 (\$ MN)

- 7.1 Key trends
- 7.2 Hospitals
- 7.3 Specialty centers
- 7.4 Other end users

CHAPTER 8 COMPANY PROFILES

- 8.1 AbbVie
- 8.2 Alexion Pharmaceuticals
- 8.3 Amgen

8.4 Boehringer Ingelheim International

8.5 BIOCAD

8.6 Biogen

8.7 Bristol Myers Squibb

8.8 Eli Lilly and Company

8.9 F. Hoffmann-La Roche

8.10 Generium

8.11 GlaxoSmithKline

8.12 Johnson & Johnson

8.13 Merck

8.14 Nanolek

8.15 Novartis

8.16 Pfizer

8.17 Regeneron Pharmaceuticals

8.18 R-Pharm

8.19 Sanofi

8.20 Takeda Pharmaceutical Company

I would like to order

Product name: Russia Monoclonal Antibodies Market Opportunity, Growth Drivers, Industry Trend Analysis, and Forecast 2024 - 2032

Product link: <https://marketpublishers.com/r/R5C2E2F535F5EN.html>

Price: US\$ 4,850.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
