Abstracts

The Global Satellite Component Market was valued at USD 3 billion in 2024 and is projected to grow at a CAGR of 7.1% from 2025 to 2034. This growth is driven by the rising demand for reliable satellite-based communication solutions, particularly in areas lacking efficient terrestrial infrastructure. Satellites help in providing high-speed internet, television broadcasting, and secure communication services, catering to underserved and remote regions worldwide.

The liberalization of space policies has significantly contributed to market expansion. By allowing foreign ownership in satellite manufacturing, countries are positioning themselves as key hubs for producing and launching cost-effective satellites. These policy changes have facilitated the scalable production of satellites, essential for building large constellations to enhance global connectivity, especially in regions with limited access to traditional communication networks.

Despite its potential, the satellite component market faces challenges such as high development costs, lengthy production timelines, and technical hurdles in miniaturization and power optimization. However, the growing demand for small satellite constellations presents substantial opportunities. These constellations are increasingly used for applications like global connectivity, the Internet of Things (IoT), and Earth observation. Regulatory compliance, particularly regarding spectrum allocation and space debris mitigation, remains a critical factor shaping market dynamics.

In terms of application, the communication segment dominated the market in 2024, accounting for a 61.7% share. Communication satellites provide global connectivity through telecommunications, broadcasting, and internet services. Advances in payload

technologies, antennas, and transponders ensure high-quality and reliable data transmission, addressing the growing need for low-latency broadband and mobile communication.

The market is also segmented by end-users into commercial, government, military, and scientific institutions. The commercial segment emerged as the fastest-growing category in 2024, with a projected CAGR of 7.8% during 2025-2034. This growth is fueled by the increasing adoption of satellite-based services for telecommunications, broadband, and broadcasting. Efforts to develop cost-efficient, scalable satellite components, including compact payloads and propulsion systems, drive innovation across the commercial sector.

North America satellite component market held 35.2% share, reaching USD 1.5 billion in 2024. The region's leadership is attributed to strong government support, significant private investments, and continuous advancements in technology. The regulatory framework, shaped by agencies like the Federal Communications Commission (FCC), fosters innovation and supports the development of advanced satellite constellations and defense systems.

Contents

Report Content

CHAPTER 1 METHODOLOGY & SCOPE

- 1.1 Market scope & definitions
- 1.2 Base estimates & calculations
- 1.3 Forecast calculations
- 1.4 Data sources
 - 1.4.1 Primary
 - 1.4.2 Secondary
 - 1.4.2.1 Paid sources
 - 1.4.2.2 Public sources

CHAPTER 2 EXECUTIVE SUMMARY

- 2.1 Industry synopsis, 2021-2034

CHAPTER 3 INDUSTRY INSIGHTS

- 3.1 Industry ecosystem analysis
 - 3.1.1 Factor affecting the value chain
 - 3.1.2 Profit margin analysis
 - 3.1.3 Disruptions
 - 3.1.4 Future outlook
 - 3.1.5 Manufacturers
 - 3.1.6 Distributors
- 3.2 Supplier landscape
- 3.3 Profit margin analysis
- 3.4 Key news & initiatives
- 3.5 Regulatory landscape
- 3.6 Impact forces
 - 3.6.1 Growth drivers
 - 3.6.1.1 Increasing demand for satellite-based communications solutions
 - 3.6.1.2 Expanding global satellite constellations for connectivity
 - 3.6.1.3 Advancements in miniaturization and satellite efficiency
 - 3.6.1.4 Government investments in space infrastructure and defense
 - 3.6.1.5 Rising demand for Earth observation data services

- 3.6.2 Industry pitfalls & challenges
 - 3.6.2.1 High capital expenditure and long development timelines
 - 3.6.2.2 Geopolitical tensions affecting satellite market access
- 3.7 Growth potential analysis
- 3.8 Porter's analysis
- 3.9 PESTEL analysis

CHAPTER 4 COMPETITIVE LANDSCAPE, 2024

- 4.1 Introduction
- 4.2 Company market share analysis
- 4.3 Competitive positioning matrix
- 4.4 Strategic outlook matrix

CHAPTER 5 MARKET ESTIMATES & FORECAST, BY COMPONENT TYPE, 2021-2034 (USD MILLION)

- 5.1 Key trends
- 5.2 Structure and mechanisms
- 5.3 Power systems
- 5.4 Communication systems
 - 5.4.1 Transponders
 - 5.4.2 Antennas
 - 5.4.3 Receivers/transmitters
- 5.5 Propulsion system
- 5.6 Thermal control systems
- 5.7 Others

CHAPTER 6 MARKET ESTIMATES & FORECAST, BY APPLICATION, 2021-2034 (USD MILLION)

- 6.1 Key trends
- 6.2 Communication
- 6.3 Earth observation
- 6.4 Technology development
- 6.5 Navigation
- 6.6 Space Science
- 6.7 Others

CHAPTER 7 MARKET ESTIMATES & FORECAST, BY END USE, 2021-2034 (USD MILLION)

- 7.1 Key trends
- 7.2 Commercial
- 7.3 Government & military
- 7.4 Scientific & research institutions

CHAPTER 8 MARKET ESTIMATES & FORECAST, BY REGION, 2021-2034 (USD MILLION)

- 8.1 Key trends
- 8.2 North America
 - 8.2.1 U.S.
 - 8.2.2 Canada
- 8.3 Europe
 - 8.3.1 UK
 - 8.3.2 Germany
 - 8.3.3 France
 - 8.3.4 Italy
 - 8.3.5 Spain
 - 8.3.6 Russia
- 8.4 Asia Pacific
 - 8.4.1 China
 - 8.4.2 India
 - 8.4.3 Japan
 - 8.4.4 South Korea
 - 8.4.5 Australia
- 8.5 Latin America
 - 8.5.1 Brazil
 - 8.5.2 Mexico
- 8.6 MEA
 - 8.6.1 South Africa
 - 8.6.2 Saudi Arabia
 - 8.6.3 UAE

CHAPTER 9 COMPANY PROFILES

- 9.1 Raytheon Technologies

- 9.2 Boeing Defense, Space & Security
- 9.3 Airbus Defence and Space
- 9.4 Challenger Communications
- 9.5 Honeywell International Inc.
- 9.6 IHI Corporation
- 9.7 JONSA TECHNOLOGIES CO., LTD.
- 9.8 L3Harris Technologies
- 9.9 Lockheed Martin Corporation
- 9.10 Northrop Grumman Corporation
- 9.11 OHB SE
- 9.12 General Dynamics
- 9.13 Leonardo S.p.A.
- 9.14 Mitsubishi Electric Corporation
- 9.15 Sat- lite Technologies
- 9.16 THALES
- 9.17 Viking Satcom
- 9.18 RUAG Space
