## Abstracts

The Global Used Golf Cart Market was valued at USD 976.6 million in 2024 and is expected to grow at a robust CAGR of 6% between 2025 and 2034. The increasing demand for affordable, sustainable, and versatile transportation solutions has significantly bolstered the market's expansion. Used golf carts, recognized for their cost-effectiveness, low maintenance, and adaptability, have gained traction among small businesses, families, and individuals alike. These vehicles are increasingly utilized beyond golf courses, finding applications in gated communities, retirement villages, industrial facilities, and recreational spaces. The shift towards eco-friendly solutions further fuels the market, as electric and solar-powered models align with global efforts to reduce carbon footprints. The used cart segment also benefits from a steady supply driven by frequent fleet upgrades at golf courses, ensuring a consistent stream of well-maintained vehicles into the resale market.

By fuel type, the market is segmented into electric, gasoline, and solar-powered models. In 2024, the electric segment held a dominant 63% market share and is projected to generate USD 1.1 billion by 2034. Electric golf carts are highly favored for their energy efficiency, quiet operation, and adaptability across diverse applications. As technology advances, these models continue to set benchmarks in sustainability and performance. Meanwhile, gasoline-powered carts remain a preferred choice for tasks demanding extended range, quick refueling, and heavy-duty performance, making them ideal for rugged outdoor environments, industrial use, and agricultural operations. Solar-powered carts, though a smaller segment, are steadily gaining attention as innovations improve their viability and appeal for eco-conscious consumers.

The market is also categorized by application into golf course, commercial service, and personal use. The golf course segment captured 51% of the market in 2024, driven by

sustained demand for reliable and cost-efficient fleets. Golf courses rely on these vehicles to enhance player experience and streamline operations, frequently refreshing their fleets and contributing significantly to the availability of used carts in the resale market. Commercial services, such as resorts, event venues, and campuses, further underscore the utility of these versatile vehicles.

In the United States, the used golf cart market accounted for an impressive 95% share in 2024 and is projected to generate USD 995 million by 2034. The country's extensive network of golf courses and a large golfing population are key contributors to this dominance. Additionally, the carts' adaptability for residential, commercial, and industrial applications drives their widespread adoption. With their practicality, ease of use, and cost advantages, golf carts have become indispensable in a variety of settings.

### CHAPTER 1 METHODOLOGY & SCOPE

- 1.1 Research design
  - 1.1.1 Research approach
  - 1.1.2 Data collection methods
- 1.2 Base estimates and calculations
  - 1.2.1 Base year calculation
  - 1.2.2 Key trends for market estimates
- 1.3 Forecast model
- 1.4 Primary research & validation
  - 1.4.1 Primary sources
  - 1.4.2 Data mining sources
- 1.5 Market definitions

### CHAPTER 2 EXECUTIVE SUMMARY

- 2.1 Industry synopsis, 2021 - 2034

### CHAPTER 3 INDUSTRY INSIGHTS

- 3.1 Industry ecosystem analysis
  - 3.1.1 Technology providers
  - 3.1.2 Component suppliers
  - 3.1.3 Manufacturers
  - 3.1.4 OEMs
- 3.2 Supplier landscape
- 3.3 Profit margin analysis
- 3.4 Technology & innovation landscape
- 3.5 Key news & initiatives
- 3.6 Regulatory landscape
- 3.7 Impact forces
  - 3.7.1 Growth drivers
