## Abstracts

Unmanned underwater vehicles (UUV), sometimes known as underwater drones, are any vehicles that are able to operate underwater without a human occupant. These vehicles may be divided into two categories, remotely operated underwater vehicles (ROVs), which are controlled by a remote human operator, and autonomous underwater vehicles (AUVs), which operate independently of direct human input. Global total Capex (capital expenditure) of military and defense UUVs in 2025 will advance to \$XXX billion, representing a robust growth at XX% per annum between 2016 and 2025. The cumulative Capex of global military and defense UUVs is expected to reach \$13.6 billion during 2017-2025 driven by the substantial rising adoption of ROVs and AUVs in military and defense activities.

Highlighted with 34 tables and 68 figures, this 148-page report “Unmanned Underwater Vehicles (UUVs) for Military and Defense: Global Market 2017-2025 by Vehicle Type, System Component, Propulsion System and Region” is based on a comprehensive research of the military and defense UUVs market by analyzing the entire global market and all its sub-segments through extensively detailed classifications.
