### Advanced Distribution Management System Market Report Highlights

Based on the offering, the solutions segment dominated the market, accounting for 74.4% of the share in 2023. The growing emphasis given to grid modernizations by enterprises is driving this segment's growth

Based on deployment, the on-premises segment accounted for the majority share in 2023 and is estimated to expand at a significant CAGR over the forecast period. An increasing number of cyberattacks is leading to growing concerns among enterprises regarding data privacy and security. Subsequently, the adoption of on-premises infrastructure is rising since it grants the company more security, privacy, and greater control than cloud technology

Based on functionality, supervisory control and data acquisition dominated the market in 2023 and is expected to expand at the fastest CAGR over the forecast period. The market demand to enhance response to power outages and incorporate renewable energy more effectively is fostering the segment's growth

Based on organization size, the large enterprise segment held the dominant share in 2023 and is expected to grow at a rapid CAGR over the forecast period. The key driver of this segment's growth is that these enterprises make larger investments due to the availability of deep budgets

Based on end-use, the manufacturing segment accounted for the majority share in 2023 and is estimated to expand at a significant CAGR over the forecast period. High emphasis on power savings and maintaining stability in output are encouraging manufacturers to adopt advanced distribution management systems (ADMS)
