## **Abstracts**

The global aerospace insurance market size was valued at USD 4.8 billion in 2025 and is projected to grow from USD 4.9 billion in 2026 to USD 7.0 billion by 2033, at a CAGR of 5.2% from 2026 to 2033. North American market dominated the market, accounting for a revenue share of 44.5% in 2025. Increasing aircraft production and air traffic are driving demand for aerospace insurance by expanding the need for coverage for aircraft, liability, and operational risks.

The increasing demand for commercial aircraft is fueling market growth. As airlines expand their fleets to serve more passengers and connect to more destinations, the number of aircraft requiring insurance coverage is also increasing. With more aircraft in operation, the likelihood of damage, accidents, and other unexpected losses increases the need for financial protection. This is encouraging airlines to maintain suitable insurance coverage for their aircraft, passengers, and other parties. As a result, the continued expansion of commercial aircraft fleets is supporting market growth.
