Abstracts

The global airport stands equipment market size was valued at USD 6.8 billion in 2025 and is projected to grow from USD 7.2 billion in 2026 to USD 11.1 billion by 2033, at a CAGR of 6.3% from 2026 to 2033. North America dominated the market, accounting for the largest revenue share of 31.5% in 2025. The market is driven by ongoing investments in airport expansion, terminal modernization, and airside infrastructure development to accommodate increasing aircraft movements.

Growth in commercial aviation, air cargo operations, and fleet expansion is strengthening demand for efficient aircraft servicing solutions that improve turnaround performance and operational reliability.

In addition, the growing emphasis on optimizing aircraft parking operations and reducing apron congestion is increasing the deployment of specialized airport stands equipment across both new and existing airports. The expansion of remote stand operations and the construction of additional contact gates are driving demand for reliable stand guidance, docking, and safety systems.
