### Allergy Diagnostics Market Summary

The global allergy diagnostics market size was valued at USD 7.09 billion in 2025 and is projected to reach USD 16.37 billion by 2033, growing at a CAGR of 11.29% from 2026 to 2033. The growth is driven by the rising incidence of conditions such as allergic rhinitis, asthma, atopic dermatitis, and food allergies, which are becoming more common due to environmental pollution, urbanization, and lifestyle changes.

For instance, allergic rhinitis affects about 400 million individuals worldwide annually, impacting around 25% of children and 40% of adults. Furthermore, unhealthy habits, such as smoking, and urbanization, are some of the key factors contributing to the increasing incidence of allergic conditions.
