### Aminoethylethanolamine Market Growth & Trends

The global aminoethylethanolamine market size is expected to reach USD 342.6 million by 2030, registering a CAGR of 4.6% from 2025 to 2030, according to a new report by Grand View Research, Inc. Rising demand for polyurethane products as well as increasing consumption of chelating agents in detergents and cleaning products are projected to drive the market. Polyurethane is widely utilized across numerous end-use industries, such as automotive, construction, consumer goods, electrical & electronics, packaging and footwear, owing to its inherent advantageous characteristics including high thermal & chemical resistance, durability, and low-cost production.

It is one of the highly consumed plastics owing to its favorable physical properties and abrasion resistance. Aminoethyl Ethanol Amine (AEEA) is used to manufacture polyurethane that is used in the production of spray foams, appliances, building panels, and automotive elastomers. China is a global leader, in terms of polyurethane consumption, owing to rising demand from end-use industries. The presence of a large number of manufacturers coupled with investments in upstream activities is driving the demand. North America and Europe markets are growing steadily owing to slightly sluggish growth in the end-use industries.

Increased efficiency in building materials has generated higher demand for efficient insulating materials to regulate HVAC. PU foams are extremely efficient insulation materials, which lead to greater energy savings. Numerous businesses have realized other intangible benefits of green buildings, such as increased employee productivity, improved employee satisfaction, and their positive impact on company's brand and reputation. These factors are likely to fuel the utilization of AEEA in the manufacturing of polyurethane over the coming years. Furthermore, detergents and household cleaners have exhibited significant growth in the past few years due to factors such as, rising disposable income in emerging economies, which is also driving the market.
