Abstracts

The global antiscalants and scale inhibitors market size was valued at 4.1 billion in 2025 and is projected to grow from USD 4.3 billion in 2026 to USD 6.2 billion by 2033, at a CAGR of 5.3% from 2026 to 2033. Asia Pacific dominated the market, accounting for the largest revenue share of 38.2% in 2025. The industry is driven by the expanding adoption of water treatment, desalination, reverse osmosis (RO), and industrial water-reuse systems.

Antiscalants are used to control mineral deposits such as calcium carbonate, calcium sulfate, and silica, helping maintain membrane efficiency, extend equipment service life, reduce cleaning frequency, and lower operating costs.

The industry is expanding alongside the growing need for effective scale-control solutions in livestock, aquaculture, and animal-production facilities. Antiscalants and scale inhibitors are used in water-treatment systems supporting animal farms and feed operations, where maintaining water quality and preventing mineral buildup in pipelines, drinking systems, filtration units, and treatment equipment is important for reliable operations. Increasing investments in modern poultry, swine, cattle, and aquaculture facilities are driving the adoption of automated water-delivery and treatment infrastructure, creating demand for scale-management chemicals. Growing emphasis

on water efficiency, equipment longevity, and hygienic operating conditions is expected to strengthen the use of antiscalants and scale inhibitors across animal-production facilities.

Global Antiscalants and Scale Inhibitors Market Report Segmentation

This report forecasts revenue growth at the global, regional and country levels and provides an analysis of the latest industry trends in each of the sub-segments from 2021 to 2033. For this study, Grand View Research has segmented the global antiscalants and scale inhibitors market report based on product, application, end use, & region:

Product Outlook (Revenue, USD Billion, 2021 - 2033)

Phosphonate-based

Polyacrylate-based

Polymaleate-based

Sulfonated polymers

Phosphonocarboxylates
