### **Antiseptics And Disinfectants Market Growth & Trends**

The global antiseptics and disinfectants market size is anticipated to reach USD 63.1 billion by 2030, according to a new report by Grand View Research, Inc. The market is expected to expand at a CAGR of 10.1% from 2022 to 2030. Key factors driving the market expansion include technological advancements in antiseptics and disinfectants along with increasing use of endoscope reprocessors and surgical units. The current COVID-19 outbreak is expected to have a substantial impact on the market. The pandemic has resulted in a significant surge in demand for emergency supplies, hospital equipment, medicines, and medical disposables. According to Eurostat in 2020, extra-EU exports and imports of COVID-19 related products increased by 5.5 % and 10.4 % respectively, compared to 2019.

Additionally, EU extra- imports of protective oxygen and garments equipment recorded the highest increase (respectively by 38.7% and 40.3 % compared with 2019) amongst COVID-19 related products, followed by sterilization products (19.1 %) and diagnostic equipment (19.2 %). However, the highest increases for EU- extra- exports were recorded for diagnostic testing equipment (14.9%), and sterilization products (16.0 %).

As a result, market growth is expected to accelerate in the near future. Furthermore, the global market for antiseptics and disinfectants is consolidating due to the rising popularity of medical equipment along with the increased research collaboration and agreements between diverse manufacturers. For instance, in June 2021, Bactiguard and Sch?lke & Mayr GmbH, a German company, agreed to distribute Bactiguard's wound care solutions exclusively to German hospitals. The agreement allows sch?lke to add Bactiguard's hypochlorous acid-based portfolio to its existing antiseptic and wound-care product

line which will, in turn, push the market scale during the study period.
