Anxiety Disorders And Depression Treatment Market Growth & Trends

The global anxiety disorders and depression treatment market size is estimated to reach USD 19.28 billion by 2030, registering growth at a CAGR of 3.8% from 2025 to 2030 according to a new report by Grand View Research, Inc. The rising incidence of depression worldwide is anticipated to drive the market growth in the coming years. Increasing adoption of devices and psychotherapies has resulted in the declining demand for antidepressants in recent years.

The rising geriatric population prone to depression and surging prevalence of anxiety disorders, including phobias and generalized anxiety disorder, are further contributing toward the growing demand for antidepressants to treat mental illnesses over the forecast period. Moreover, the introduction of technologically advanced therapies, such as medical implants used for brain stimulation and virtual reality exposure therapies using smartphone-based applications, furnish patients with innovative treatment alternatives.
