Apricot Oil Market Growth & Trends

The global apricot oil market size is anticipated to reach USD 2,865.7 million by 2030 and is projected to grow at a CAGR of 5.9% from 2024 to 2030, according to a new report by Grand View Research, Inc. The market is being driven by several key factors. The market for apricot oil is being primarily driven by the increasing demand for natural and organic skincare and haircare products. Apricot oil is rich in vitamins and minerals, making it a popular ingredient in cosmetics due to its nourishing and moisturizing properties. Consumers are increasingly seeking natural alternatives to synthetic ingredients, and apricot oil fits this demand as a botanical extract with various beneficial properties for skincare and haircare. This trend is supported by the growing awareness of the potential harmful effects of chemicals found in many conventional beauty products, leading consumers to opt for natural and organic alternatives like apricot oil.

The rise in the popularity of wellness and self-care practices is also contributing to the market growth. As individuals become more conscious about taking care of their overall well-being, the demand for natural and holistic products, including apricot oil, has surged. The oil is considered beneficial for aromatherapy and massage due to its light texture and mild aroma, adding to its appeal in the wellness industry.

Additionally, the increased focus on holistic health and wellness has driven the demand for apricot oil as a dietary supplement, as it is rich in essential fatty acids and has potential health benefits when consumed orally.

The expanding application of apricot oil in the food and beverage industry is also propelling market growth. With its light flavor and high smoke point, apricot oil is being used as a healthy cooking oil and in the production of various food products. Its nutritional profile and potential health benefits have garnered attention among health-conscious consumers, leading to its incorporation into a range of food and beverage offerings. As a result, the diverse applications of apricot oil across multiple industries are playing a significant role in driving its market growth.

Apricot Oil Market Report Highlights

Based on application, the cosmetics segment led the market with the largest revenue share of 40.20% in 2023. Apricot oil's rich composition of vitamins and minerals makes it a sought-after ingredient by beauty and cosmetic companies looking to meet the growing demand for clean, plant-based formulations. Its moisturizing and nourishing properties make it a popular choice in various cosmetics such as creams, lotions, serums, and hair care products. As consumers continue to prioritize health and wellness through their beauty routines, the natural benefits of apricot oil have propelled its prominence in the cosmetics industry, driving a significant share of global revenues in 2023

Based on distribution channel, the online distribution segment is anticipated to grow at the fastest CAGR of 6.1% from 2024 to 2030. The increasing consumer preference for convenience, variety, and accessibility offered by online shopping. As e-commerce platforms continue to expand and

improve their offerings, consumers are increasingly inclined to purchase products, including apricot oil, through online channels due to the convenience of doorstep delivery, a wide range of product options, and the ability to compare prices and read reviews. This shift in consumer behavior is expected to drive sustained growth in online sales of apricot oil over the forecast period

The apricot market in Asia Pacific accounted for revenue share of 30.25% in 2023. It is primarily due to the region's large population, increasing consumer awareness about health and wellness, and the growing utilization of apricots in various culinary and cosmetic applications. In addition, the rising disposable incomes in several countries within the region have led to greater consumer spending on premium and healthy products, further fueling the demand for apricots and apricot-based products
