Asia Pacific, Middle East And Africa Emulsifiers Market

The Asia Pacific, Middle East And Africa emulsifiers market size is expected to reach USD 4.24 billion by 2030, as per the new report by Grand View Research, Inc., expanding at a CAGR of 6.7% from 2022 to 2030. The industry is majorly driven by the rapid growth of the food and beverage industries and increase in the population.

The market in Asia Pacific, Middle East And Africa is anticipated to be driven by the demand for emulsifiers in food and beverage products. Favorable regulatory policies promoting the use of bio-based products and high consumer awareness regarding the toxicity of synthetic products are expected to further complement the demand for emulsifiers in these regions over the forecast period.

The market is established with major applications in food products. Asia Pacific emerged as the leading region in 2021. However, regional jurisdiction and regulatory scenario in food and beverages processing are likely to be the challenges for regional growth.

Raw materials such as sorbitan esters and stearyl lactylates are also used as emulsifiers. The lecithin (emulsifier) market is expected to witness substantial growth over the upcoming years owing to its lubricant and emulsification properties that are

widely used in the food & beverage industry. Increasing demand for convenience foods, nutrients and supplements, and natural foods is expected to serve as a key driver for the market.

Emulsifiers are widely used in the baked food industry for improving taste, starch complexing, protein interaction, fat emulsification like in biscuits, viscosity and fat crystallization, modification of texture, improvement of aeration, and foaming properties in cakes.

A shortfall in product supply created a demand and supply gap, which affected the growth of the emulsifier market for a short span of time. However, the emulsifier market has moved toward stability and even gained profit since 2021, following relaxation in restrictions imposed by the governments of different nations. Manufacturers are recovering from the losses they incurred and are operating at full capacity. The aforementioned factors are projected to augment the industry growth over the forecast period.

Asia Pacific, Middle East And Africa Emulsifiers Market Report Highlights

The market growth in APAC and the MEA can be attributed to the rise in the baked food and beverage industry and the growing population

Asia Pacific captured a leading revenue share of over 80.0% in 2021. This is owing to the rising foreign investments in the food-processing sector, coupled with the availability of abundant raw material sources and a broad consumer base

By product, mono and di-glycerides held the largest revenue share of over 25.0% in 2021. They are most commonly used in baked goods and are manufactured from lipids via catalytic transesterification of glycerol

The food application segment was the largest application segment in 2021 with a revenue share of over 75.0%. This is attributed to high demand from the bakery industry

Companies including Cargill, Kerry, Basf SE, Corbion, and Nexira are exclusively engaged in the production and marketing of food emulsifiers. These companies sell their products through direct supply agreements and third-party agreements
