Automotive Textiles Market Growth & Trends

The global automotive textiles market is expected to reach USD 38.47 billion by 2030, expanding at a compounded annual growth rate (CAGR) of 3.2% from 2022 to 2030, according to a new report by Grand View Research Inc. Growth in automobile production coupled with the increasing focus on safety devices is expected to propel market growth.

The industry observes integration among the raw material manufacturers, producers, and distributors. Distributors assist the automotive industries in effectively using the product across the entire range of their major applications. Distributors act as the key link between the manufacturers and the automotive sectors, which require textiles for car seat covers, for production of airbags, and seat belts, among several others.

Major raw materials for automotive textiles are woven, composite, and various other nonwoven fabrics that are 100% polypropylene. Manufacturers of automotive textile continue to be alert about dealing with the raw materials price fluctuations and invest in research & development for innovative techniques to minimize the risks associated with it.
