Abstracts

The global automotive timing belt market size was estimated at USD 7,739.1 million in 2025 and is projected to reach USD 10,986.9 million by 2033, growing at a CAGR of 4.5% from 2026 to 2033. Rising sales of passenger and commercial vehicles, particularly in emerging economies, increase the demand for automotive timing belts used in engine synchronization.

As vehicle production grows, manufacturers require reliable timing belt components, supporting consistent demand for replacement parts and original equipment across expanding automotive markets. In addition, advancements in belt materials, such as high-strength rubber and reinforced fibers, are improving durability and extending service life, encouraging adoption. The expanding automotive aftermarket sector and growing awareness about regular vehicle maintenance are also supporting market growth, as timely replacement of timing belts helps prevent engine damage and costly repairs.
