Bariatric Beds Market Growth & Trends

The global bariatric beds market size is expected to reach USD 417.24 million by 2030 to expand at a CAGR of 5.1% from 2023 to 2030, according to a new report by Grand View Research, Inc. The market growth is primarily driven by the rising geriatric population, increase in disease burden, high unmet medical needs in emerging & low-growth economies, and increase in public & private healthcare expenditure to improve the number of beds to patient ratio.

The presence of Public-Private Partnerships (PPP) in the U.S., Europe, and the Middle East is anticipated to open new avenues for investments in the bariatric beds market. The Ministry of Health (MOH) of Turkey announced about 95,000 new hospital beds including bariatric beds are required by the year 2023. Also, rising funding by various government bodies and medical equipment manufacturers toward R&D is expected to promote market growth.

The adoption of innovative platforms from the manufacturers/traders for the sale of DME such as online portals that help end users find equipment/device that suits their requirements is anticipated to boost the sale of bariatric beds. Additionally, supportive technological infrastructure in the U.S., U.K., Germany, India, China, and Japan is expected to assist in the market growth during the forecast period.

An increasing number of obese people across the globe is anticipated to surge the demand for bariatric beds during the forecast period. For instance, as per the Harvard School of Public Health, nearly 40% of American adults aged 20 and above are obese. And around 71.6% of adults aged 20 and above are overweight, including obesity.

Bariatric Beds Market Report Highlight

500-700 lbs segment held the largest market share in 2022 as they are widely preferred and used by patients across the globe.

Hospital segment held a significant market share in 2022 owing to the increasing number of surgeries specifically for obese patients across all hospitals.

North America is the leading region in 2022 owing to the high economic development and presence of advanced research centers, hospitals, and medical device manufacturers.

Asia Pacific is anticipated to grow at the fastest growth rate during the forecast period due to high research expenditure by public and private entities, and the availability of technologically advanced products.
