## **Abstracts**

The global betulin market size was estimated at USD 964.4 million in 2024 and is projected to reach USD 1,733.8 million by 2033, growing at a CAGR of 6.9% from 2025 to 2033. The betulin industry is growing steadily, driven by rising demand for natural, plant-based ingredients in pharmaceuticals and cosmetics.

Its strong anti-inflammatory and antioxidant properties, along with the global shift toward sustainable products, are key factors supporting market expansion. Growing R&D activities in biotechnology and pharmaceuticals are driving the demand for betulin and its derivatives. Ongoing studies highlighting its anticancer, antiviral, and anti-inflammatory properties are fostering new formulation developments and clinical applications. In addition, rising investments in natural compound-based drug discovery are enhancing betulin's commercial potential across therapeutic and healthcare segments.

The growing focus on green and sustainable extraction technologies offers a major opportunity for the betulin industry. Utilizing eco-friendly methods to extract betulin from birch bark can reduce costs and appeal to environmentally conscious brands. This approach also helps companies meet clean-label and sustainability standards. As industries shift toward natural sourcing, demand for eco-extracted betulin is expected to increase.
