Beverage Packaging Market Growth & Trends

The global beverage packaging market size is expected to reach USD 222.08 billion by 2030, registering a CAGR of 5.0% during the forecast period, according to a new report by Grand View Research, Inc. Increasing consumption of beverages coupled with surging demand for convenient and sustainable packaging solutions is estimated to propel the market.

The global beverage packaging market is witnessing a huge demand from alcoholic as well as non-alcoholic beverage segments in emerging economies. The overall market is also observing growth on account of soaring demand for functional drinks. Rapid urbanization and widening base of middle-class population in developing economies are resulting in lifestyles changes, including rise in the demand for beverages.

Bottle & jars were the largest product segment in 2023. However, carton is anticipated to witness the most promising growth over the forecast period owing to burgeoning adoption of active packaging. It helps in extending shelf life of products by utilizing several systems such as moisture absorbers, oxygen scavengers, antioxidants, and

antimicrobial agents. It can also facilitate easier processing as well as consumption of the beverage.

Bottle & jars are typically made up of glass and plastic. The demand for plastic bottles is directly supplemented by rising consumption of bottled drinking water and carbonated soft drinks. High-density polyethylene (HDPE) and polyethylene terephthalate (PET) are among the major grades of plastics utilized to manufacture plastic bottles. Phenomenal growth in the single-serve water packaging segment is likely to push the demand for plastic bottles during the forecast period.
