Broadband Service Market Growth & Trends

The global broadband services market size is estimated to reach USD 875.1 billion by 2030, according to the new report by Grand View Research, Inc. The market is expected to expand at a CAGR of 9.6% from 2022 to 2030. The rapidly escalating demand for broadband services due to their ability to offer higher data access to the internet using a wide spectrum of technologies is a major propeller of market growth of the market.

The market is positioned to register strong growth over the forecast period, driven primarily by the steep demand in the market. The high demand is supported by proactive government initiatives, technological advancements for improved user convenience, consumer awareness, and increased usage of devices-such as mobile phones, tablets, MIDs, and eBooks-requiring a broadband connection. The internet speed and widespread availability of broadband services are notable growth-contributors.

Some of the key market trends in the market include the following: strategic usage of broadband pre-registration indices to collect market data regarding price, engineering decisions, and user preferences; online registration of broadband services makes the

process transparent and user-friendly; electronic signature in registration documents and validation of identity proofs aids in maintaining an automatic contract status and limits malpractice; system integration is increasingly emphasized to offer a one-stop-shop service for all marketing, mails, management, installation, and customer support needs; and finally, B2C models are increasingly focused on impacting crowd mentality to attract a larger customer base.

The COVID-19 pandemic has rendered a positive impact on the broadband services as digital consumption has witnessed a sharp rise over the last few weeks. Work-from-home concepts in most business, online classes in education formats, higher usage of video calls for conferences and personal uses, online shopping of essential items, and higher viewership of entertainment content have notably increased the requirement for broadband services. Investment in companies to adopt digital channels for product promotion and sales is also likely to surge in the near future. Besides speed, add-on services are a key attraction for customers, thereby leveling up the competitive rivalry in the market.
