Abstracts

The global calcium peroxide market size was valued at USD 515.0 million in 2025 and is projected to grow from USD 542.8 million in 2026 to USD 818.4 million by 2033, at a CAGR of 6.0% from 2026 to 2033. Asia Pacific dominated the market, accounting for the largest revenue share of 40.8% in 2025. Market growth is driven by the increasing adoption of calcium peroxide in soil and groundwater remediation, rising demand for sustainable agricultural inputs, and expanding applications in food processing and personal care products, owing to its controlled oxygen-release and oxidizing properties.

Increasing environmental concerns and the growing emphasis on sustainable remediation solutions are driving the demand for calcium peroxide across multiple industries.

Applications such as soil and groundwater remediation, agriculture, flour bleaching and dough conditioning, toothpaste additives, and wastewater treatment are witnessing higher adoption due to calcium peroxide's controlled oxygen release, oxidizing properties, and ability to improve environmental and product performance across diverse end use sectors.
