## **Abstracts**

### Summary

The Canada flavors market size was estimated at USD 357.5 million in 2024 and is projected to reach USD 518.9 million by 2033, growing at a CAGR of 4.3% from 2025 to 2033. Evolving consumer preferences and the food industry's response to these shifts are primary market drivers.

There is a strong and sustained demand for natural and clean-label flavors, as consumers increasingly seek products with fewer artificial ingredients. The growing interest in plant-based foods also necessitates new and improved flavors to enhance the taste and texture of alternative protein products, making them more appealing to a broader consumer base. Furthermore, the consumer's increasing demand for convenience and intriguing flavors is expected to play a pivotal role in supporting the industry's growth. For instance, recent trends in packaged food products have shown significant growth in flavors such as tahini, pesto, Mexican, sundried tomato, peri/piri, and Turkish delight, indicating a shift toward more adventurous and international palates.
