Canada Hospitality Mattress Market Trends

The Canada hospitality mattress market size was estimated at USD 205.2 million in 2024 and is projected to reach USD 333.0 million by 2033, growing at a CAGR of 5.6% from 2025 to 2033. The market growth is primarily driven by the expansion of the tourism and hotel industry, rising urbanization, and increasing disposable incomes. As cities like Toronto and Vancouver attract more travelers, hotels invest in high-quality mattresses to enhance guest comfort.

At the same time, growing health awareness among consumers is boosting demand for mattresses that offer orthopedic support and improve sleep quality, making advanced, comfort-focused bedding a priority across the hospitality sector.

In the hospitality industry, mattresses must resist frequent use while maintaining hygiene and comfort standards. To meet these demands, many brands are now engineered with antimicrobial covers and easy-to-clean materials that help prevent the buildup of bacteria, allergens, and odors, which are crucial in ensuring a safe and sanitary environment for guests. For instance, brands like Restwell Sleep Products, a leading local mattress manufacturer in Canada, offer hospitality-grade mattresses with features like antimicrobial fabrics and moisture-resistant barriers, tailored specifically for

hotels and commercial settings.

Sustainability has become a key focus in the hospitality mattress market as environmentally conscious travelers seek eco-friendly accommodations. In response, hotels opt for mattresses made from natural latex, recycled foams, and innovative materials like phase-change cooling fabrics that reduce environmental impact while enhancing comfort. For instance, Obasan is an Ottawa-based company that handcrafts mattresses using only GOTS and GOLS certified organic latex, wool, and cotton. Their offerings, including models like the Auberge and Deluxe, feature plant-based latex that's naturally antimicrobial, breathable wool that wicks moisture, and chemical free fabrics, making them ideal for sustainable hospitality environments.
