Abstracts

The global caps and closures market size was estimated at USD 111.01 billion in 2025 and is expected to reach USD 167.41 billion by 2033, growing at a CAGR of 5.3% from 2026 to 2033. The growing demand for various food products and alcoholic and non-alcoholic beverages is anticipated to drive market growth.

Caps and closures act as barriers, preventing packaged contents from exposure to ambient air and dust particles, while allowing easy dispensing. Caps and closures are used in several other end-use industries, including healthcare, personal care, home care, and automotive. Rising awareness about the benefits of healthy eating is likely to boost the demand for dietary supplements, which in turn is expected to further drive demand for packaging products.

Council for Responsible Nutrition (CRN), a leading trade association representing dietary supplement and functional food manufacturers and ingredient suppliers in the U.S., conducted a consumer survey in 2023 on dietary supplements, wherein multivitamins were consumed by 70% of participants, followed by specialty supplements such as omega-3s, melatonin, probiotics, and fiber used by 52 % of participants. In addition, the sports nutrition supplements segment witnessed a 5% increase in consumption compared to previous years. All these factors are anticipated to drive the demand for market growth.

Increasing demand for caps and closures is closely associated with the rise of

urbanization in the U.S. Consumers in urban areas prefer packaging solutions that are convenient and suitable for on-the-go consumption of food and beverages. Caps and closures play a vital role in providing this convenience by ensuring easy opening and closing of products and preventing spills. In addition, they create an airtight seal that keeps the products fresh for a longer period by preventing the entry of bacteria. These address the growing concerns about safety and hygiene associated with food and beverage products, as they help prevent spoilage. Hence, the expanding food and beverage industry with growing urbanization is expected to boost the demand for caps and closures over the forecast period.
