### Cardiovascular Digital Solutions Market Growth & Trends

The global cardiovascular digital solutions market size is expected to reach USD 148.6 billion by 2030 to expand at a CAGR of 4.8% from 2023 to 2030 based on a new report by Grand View Research, Inc. The increasing prevalence of cardiovascular diseases globally, continuously growing elderly population, rise in the awareness regarding the cardiac diseases and treatments among the population are some of the factors driving the growth of the market.

Digital solutions in cardiology are available in various forms such as monitoring devices, mobile phone applications, wearable technology, software, sensors, etc. These devices are efficient in monitoring, dealing with, and regulating chronic heart conditions. Digital therapeutics have been able to enhance treatment effectiveness while reducing the economic burden on patients and healthcare providers in a short period of time.

The COVID-19 pandemic has had a profound impact on the global economy and almost all aspects of personal lives. Procedure-based patient care has been largely suspended, owing to the need to expand the capacity of hospitals & health care systems and the aim to reduce the risks of infection for the patients and physicians. Similarly, diagnostic follow-ups and evaluations have either been postponed or

rethought in approach. Cardiovascular management has therefore provided unique clinical concerns during the COVID-19 pandemic.
