Cat Vaccine Market Growth & Trends

The global cat vaccine market size is expected to reach USD 2.5 billion by 2030 and is anticipated to expand at a CAGR of 9.4% from 2024 to 2030, according to a new report by Grand View Research, Inc. Rising pet ownership, emerging diseases in cats, and rising disposable income is expected to increase the market value for cat vaccines. Furthermore, pharmaceutical industry investments are also expected to boost market growth.

The rising market trend is due to the growing awareness among pet owners about the necessity of cat vaccines, promoting preventive healthcare, and ensuring the well-being of their feline companions. Pet owners now prioritize products that match their pets' dietary needs and personal values, turning to online pet brands for convenient access to premium and nutritious pet items.
