Chemo Graded Nitrile Powder-free Medical Examination Gloves Market Growth & Trends

The global chemo graded nitrile powder-free medical examination gloves market size is anticipated to reach USD 494.9 million by 2028, according to a new report by Grand View Research, Inc. The market is expected to expand at a CAGR of 8.0% from 2019 to 2028. The increasing prevalence of cancer cases across the globe is likely to boost market growth over the forecast period.

A surge in the pervasiveness of cancer is majorly attributed to various risk factors such as smoking, alcohol use, lack of exercise, poor nutrition, and obesity. According to the International Agency for Research on Cancer, the total number of estimated cancer cases was 19.3 million in 2020, with around 10 million deaths.

As the number of cancer patients is increasing each year, there has been a strong emphasis on the early diagnosis of cancer. Early detection and screening have resulted in increased demand for chemotherapy. This, in turn, is anticipated to augment market growth over the forecast period.

The demand for chemo graded gloves is rising rapidly as the number of cancer patients

is rising across the globe. Manufacturers are focused on launching new high-quality gloves. For instance, in March 2021, V12 Health launched a new product line of chemo graded nitrile powder-free medical examination gloves and TPET gloves.

Chemo Graded Nitrile Powder-free Medical Examination Gloves Market Report Highlights

Asia Pacific accounted for revenue share of 42.1% in 2020 owing to the high cancer prevalence and high mortality rate caused by cancer in the region

China is anticipated to witness a CAGR 8.7% over the forecast period, as the healthcare infrastructure is expanding rapidly, resulting in improving the cancer screening process and cancer treatment in China

Germany is expected to witness a CAGR 7.5% over the forecast period on account of the presence of advanced infrastructure & technology coupled with government support to revolutionize medical treatment

Manufacturers of chemo graded nitrile gloves are focusing on rising production capacity by expanding their facilities. For instance, in March 2020, Hartalega purchased land to expand its glove production facilities in Malaysia

Furthermore, the market players are focusing expansion of business footprints globally. For instance, in December 2020, Ansell Ltd. acquired the Primus brand to increase its presence in India
