### Chlorine Dioxide Market Size & Trends

The global chlorine dioxide market size was estimated at USD 1.04 billion in 2023 and is projected to expand at a CAGR of 5.9% from 2024 to 2030. The market is experiencing significant growth due to increased demand from industries, particularly for treating wastewater. This surge is driven by heightened water consumption across diverse industrial sectors, including oil & gas, pharmaceuticals, and chemicals, which is expected to propel market expansion.

Growing environmental awareness and strict governmental regulations concerning industrial wastewater management are key drivers boosting the demand for chlorine dioxide. Additionally, there is expected to be a substantial increase in chlorine dioxide usage within the food & beverage sector, driven by the global demand for processed food products.
