### Coffee Machine Market Growth & Trends

The global Coffee Machine market size is expected to reach USD 9.26 billion by 2030, registering a CAGR of 4.7% during the forecast period, according to a new report by Grand View Research, Inc. With the increasing number of discerning consumers and evolving palate for gourmet varieties, the demand for specialty beverages including coffee has grown significantly in the past few decades. This factor is expected to drive the growth of the market. Coffee is known to reduce the risk of liver diseases, cardiac failure, and type 2 diabetes. This factor will boost the consumption of coffee, ultimately contributing to the growth of the coffee machine market. Higher repair and maintenance cost is the major restraint for the growth.

The COVID-19 pandemic negatively impacted the growth of the market. Most leading brands experienced a slight decline in sales due to the pandemic. The lockdown in China has forced coffee machine manufacturers based in the U.S. and Europe to halt production as they export several input supplies temporarily. Despite threats posed by the economic implications of the COVID-19 outbreak at the start of 2020, the food service sector is gradually recovering presenting a positive outlook for the coffee machine industry.

The drip filter segment held the largest market share in 2022. As these machines are more affordable as compared to espresso types of machines. Moreover, minimum repair & maintenance costs and ample features of the drip filter machines are some of the factors that are driving the growth of the segment. Thus, it is mostly used all over the world and generated large revenue in 2022.

Europe acquired the largest revenue share in 2022. In the German automatic coffee machine industry, manufacturers are highly focused to offer products that are energy efficient. The European regulations drafted for household appliances are focused to reduce greenhouse gas (GHG) emissions and electricity consumption. Increased preference of consumers for the premiumization of coffee machines drives the market in Europe. Thus, the region generated maximum revenue in 2022.

Major market players include Keurig Green Mountain, Inc.; Panasonic Malaysia; Nestlé; Nespresso S.A.; De'Longhi Appliances S.r.l.; Electrolux; Morphy Richards India; Koninklijke Philips N.V.; Hamilton Beach Brands, Inc.; Schaerer; and Robert Bosch GmbH. The manufacturers are focusing on developing coffee machines with Wi-Fi connectivity, voice assistance, etc. Such machines wirelessly connect to smartphones, Bluetooth or Wi-Fi.
