Commercial Food Dehydrators Market Growth & Trends

The global commercial food dehydrators market size is anticipated to reach USD 1.00 billion by 2030, according to a new report by Grand View Research, Inc., registering a CAGR of 5.5% from 2025 to 2030. Growing demand for eatables with an improved shelf life is expected to boost the product demand over the forecast period. In addition, increasing awareness pertaining to the benefits associated with food dehydrators is expected to drive the market.

Food dehydrators reduce the water content from the eatables, which deems the eatable inhospitable for bacteria and prevents spoilage. This process of dehydration increases the shelf life of the eatables and aids in preservation. This process positively influences the import and export of eatables by drastically reducing their weight and elevating trade operations.

A major challenge faced by the market is the availability of other methods of food preservation. In addition, the availability of improved substitutes as compared to food dehydrators is expected to hamper the market growth. However, growing awareness pertaining to the product is likely to aid market growth over the forecast period.

In 2018, Europe was the dominant market with 35.2% revenue share owing to growing demand for packaged eatables. However, Asia Pacific is expected to overtake the region to take the lead in 2025, with a 36.7% share in terms of revenue owing to increasing demand for eatables with longer shelf life especially in China and India.

Commercial Food Dehydrators Market Report Highlights

The commercial food dehydrators market in North America dominated the global market and accounted for the largest revenue share of 38.0% in 2024 attributed to strong consumer preference for healthy, preservative-free snacks.

The U.S. commercial food dehydrators dominated the North American market and accounted for the largest revenue share in 2024, driven by health and wellness trends encouraging consumers to minimize food waste while creating nutritious snacks at home.
