Cone Crusher Market Summary

The global cone crusher market size was estimated at USD 953.9 million in 2025 and is projected to reach USD 1,290.8 million by 2033, growing at a CAGR of 3.8% from 2026 to 2033. The market is primarily driven by increasing demand for aggregates and minerals from construction, mining, and infrastructure development activities worldwide.

Rising investments in roads, railways, commercial buildings, and urban infrastructure projects are supporting demand for efficient crushing equipment. Cone crushers are widely used for secondary and tertiary crushing applications because of their high productivity, operational reliability, and ability to process hard materials.

Growing mining activities and the expansion of quarry operations are significantly strengthening demand for cone crushers worldwide. Increasing extraction of minerals, metals, coal, and construction aggregates requires efficient crushing equipment capable of handling hard and abrasive materials. Quarry operators are investing in advanced cone crushers to improve productivity, reduce operational downtime, and support high-volume material processing. Rising infrastructure development and urbanization are also increasing demand for aggregates, further supporting the installation of cone crushers across mining and quarrying operations globally.
