## Abstracts

The global construction bolts market size was valued at USD 7.4 billion in 2025 and is projected to grow from USD 7.8 billion in 2026 to USD 11.3 billion by 2033, at a CAGR of 5.5% from 2026 to 2033. Asia Pacific dominated the market, accounting for a revenue share of 34.0% in 2025. The market growth is driven by rapid urbanization, infrastructure development, and increasing investments in residential, commercial, and industrial construction.

Construction bolts are widely used to secure structural steel, concrete, bridges, industrial facilities, and other load-bearing components, making them essential for ensuring structural stability and safety.

Growing investments in residential, commercial, industrial, and infrastructure projects across the Asia Pacific continue to support demand for construction bolts used in structural steel connections, bridges, industrial facilities, transportation infrastructure, and prefabricated buildings. Rapid urbanization, government spending on public infrastructure, and expansion of manufacturing facilities are increasing construction activity across countries such as India, China, Indonesia, and South Korea. Construction bolts are widely used to secure structural components and ensure the strength, stability, and safety of buildings and infrastructure projects.

For instance, in August 2025, Saint-Gobain officially began construction of its new float glass and mineral wool insulation production lines in Chennai, India. The project

expands the company's manufacturing footprint in the country and reflects continued investment in construction-related manufacturing. Such industrial expansion, together with ongoing infrastructure and building development, is expected to support demand for construction materials and fastening products, including construction bolts, during the forecast period.

## Global Construction Bolts Market Report Segmentation

This report forecasts revenue growth at global, regional, and country levels and provides an analysis of the industry trends in each of the sub-segments from 2021 to 2033. For this study, Grand View Research has segmented the global construction bolts market based on application and region:
