Containerized Data Center Market Growth & Trends

The global containerized data center market size is anticipated to reach USD 56.0 billion by 2030, registering a CAGR of 25.1% during the forecast period, according to a new report by Grand View Research, Inc. Increasing demand for containerized data centers owing to its benefits such as easy and rapid deployment, high scalability, portability, and energy efficiency is driving the market growth. In addition, factors such as increasing investment in data centers and the growing adoption of cutting-edge technologies, such as the Internet of Things (IoT) and edge computing are the factors expected to attribute to the market growth during the forecast period.

The use of digital solutions amid COVID-19 has accelerated the adoption of technologies including containerization, microservices, cloud computing, blockchain and APIs in sectors such as healthcare and BFSI. Therefore, these industries are anticipated to present numerous opportunities for the growth of containerized data centers in the coming years. In June 2022, Altron A.S. announced that Prague-based multidisciplinary Hospital, Na Homolce hospital has acquired its mobile DC container data center, which provides the best backup system solution for IT infrastructure operations in different conditions.
