### **Contrast Media Injectors Market Growth & Trends**

The global contrast media injectors market is expected to reach USD 1.65 billion by 2030, registering a CAGR of 4.83% during the forecast period, according to a new report by Grand View Research, Inc. The market is expected to grow because of the rising demand for minimally invasive surgical procedures, along with the increasing usage of consumables for several diagnostic procedures, which are supporting the market growth of contrast media injectors.

COVID-19 had a significant impact on the contrast media injector market, in 2019, with around a 30-40% reduction in sales due to the imposed lockdown and rapid decline in imaging case volume. However, the market is expected to return to peak levels of 2019 by 2022. This is due to the launch of COVID-19 vaccines and ease in restrictions, import & export of raw materials have resumed; therefore, the market is expected to grow at a significant rate over the forecast period.

Technological advancements such as IT-enabled solutions for contrast media injectors, along with growing demand for minimally invasive surgical procedures, are expected to boost the market during the coming years. Furthermore, the large number of intraoperative imaging procedures being performed has further enhanced the demand

for these injectors, propelling the market growth.
