Abstracts

The global conveyor oven market size was valued at USD 1,100.3 million in 2025 and is projected to grow from USD 1,155.4 million in 2026 to USD 1,674.2 million by 2033, at a CAGR of 5.4% from 2026 to 2033. Asia Pacific dominated the market, accounting for the largest revenue share of 41.1% in 2025. The growing adoption of automated and continuous thermal-processing systems is supporting the conveyor oven market as manufacturers seek higher throughput, consistent product quality, and reduced dependence on manual handling.

The increasing production of processed, frozen, bakery, ready-to-eat, and convenience food products is also creating demand for continuous oven systems. Food manufacturers are investing in equipment capable of handling higher volumes while maintaining uniform cooking, baking, roasting, and drying results.

At the same time, industrial manufacturers are using conveyor-based thermal systems for applications such as coating curing, drying, and heat treatment. Improvements in infrared, convection, and impingement technologies are enhancing heating uniformity and process control, making conveyor ovens suitable for a broader range of high-volume applications.
