Crime Risk Report Market Growth & Trends

The global crime risk report market size is expected to reach USD 30.28 billion in 2030 and is projected to grow at a CAGR of 21.5% from 2025 to 2030, according to a new report by Grand View Research, Inc. Growing threats from internal and external terrorist activities coupled with rising number of financial frauds, such as fraudulent investment scams, Ponzi schemes, illegal online lotteries, and money laundering activities, are expected to drive the market over the forecast period. Crime risk analytics solutions are designed to collect crime data from law enforcement agencies and statistically predict the crime rates for every individual type of crime. The need for such solutions is growing due to increasing crime cases across the world.

Increasing personal crimes, such as homicides and kidnapping, are forcing individuals to consult crime risk report companies. Moreover, property crimes, such as carjacking, burglaries, shop robberies, and gun point robberies, make individuals and organizations take pre-emptive measures. These factors are expected to drive the growth of this market over the forecast period. Quick adoption of new and innovative technologies, such as IoT and Big Data, are increasing the complexities and security challenges regarding networks and systems. This factor is also expected to contribute to the market growth in the years to come.

Crime Risk Report Market Report Highlights

Crime risk reports provide essential data on the safety of a neighborhood, owing to which real estate developers and investors are more inclined towards procuring such reports.

The financial & cybercrime segment accounted for the largest revenue share of 38.8% in the global crime risk report industry in 2024. Incidences of corporate fraud, investment fraud, accounting fraud, and insider trading are on the rise worldwide, particularly as the volume of financial transactions increases.

The on-premise deployment segment accounted for a larger revenue share in the global market in 2024. This approach involves hosting crime risk analytics and reporting tools directly on the site or organization's infrastructure rather than leveraging cloud-based services.

Government emerged as the leading end-use segment in the global market for crime risk reports in 2024, as these services are extensively utilized by regional authorities to identify high-risk areas and neighborhoods with elevated criminal activities.

The North America crime risk report market accounted for the largest global revenue share of 37.0% in 2024, owing to the presence of several high-profile businesses in the region and the continuous risk posed by frauds or criminal activities in their operations.
