Dental Chair Market Growth & Trends

The global dental chair market size is expected to reach USD 1.48 billion by 2030, expanding at a CAGR of 5.7% from 2023 to 2030, according to a new report by Grand View Research, Inc. The market growth can be attributed to the increasing awareness and prevalence of oral diseases and the consequent increase in the demand for dental care facilities. Development in infrastructure and improving access of low- and middle-income groups to dental facilities can further boost the market.

According to the Global Oral Health Status Report 2022, published by the World Health Organization, approximately two billion people across the globe are suffering from caries of permanent teeth and 514 million children are suffering from caries of primary teeth. Moreover, one billion people worldwide are suffering from severe gum disease which is also a major cause of total tooth loss. The bad oral habits of people such as tobacco consumption and poor hygiene maintenance are contributing to the rising prevalence of these diseases.

The technological advancements in the dental chair industry are also contributing to their growing demand. The addition of innovative features such as touch screens is making these chairs more comfortable than others. In addition, mobile independent

chairs can help in increasing patients' access to oral healthcare facilities. Such innovations can further increase the adoption rate of dental chairs and boost market growth.

The negative impact of the COVID-19 pandemic was also observed in this market. Several restrictions imposed by governments across countries limited people's movement and their visits to hospitals decreased significantly. However, the market witnessed a recovery as restrictions were eased.

Dental Chair Market Report Highlights

Based on product, the power dental chair segment accounted for the largest revenue share of 63.1% in 2022 and it is also expected to register the fastest CAGR of 5.9% over the forecast period. Based on type, the ceiling-mounted segment accounted for the largest revenue share of 39.7% in 2022, owing to its easy-to-maintain attribute and effectiveness

Based on application, the examination segment dominated the market with a share of 28.4% in 2022 owing to increasing awareness regarding oral hygiene

In 2022, North America dominated the market with a revenue share of 38.1%, owing to the use of advanced technology and increased consumer knowledge. On the other hand, Asia Pacific is anticipated to grow at the fastest CAGR over the forecast period due to the increasing prevalence of oral diseases
