Diisononyl Phthalate Market Size & Trends

The global diisononyl phthalate market size was estimated at USD 3.13 billion in 2023 and is projected to grow at a CAGR of 3.8% in revenue from 2024 to 2030. The growing demand for coatings and adhesives drives the diisononyl phthalate (DINP) market. As the construction, automotive, and packaging industries continue expanding, a growing need for high-performance coatings and adhesives is needed.

DINP is a chemical used as a plasticizer to make plastics and rubber products more flexible. It is a mixture of phthalates with branched alkyl side chains of varying lengths, such as C10, C8, and C9. DINP is commonly used in various plastic items, including vinyl and PVC plastics, and in the adhesive, construction, and manufacturing industries. In addition, it is used in non-PVC products like pigments, inks, sealants, adhesives, lacquers, and paints. The market for DINP is expanding due to its wide use in key industries and the increased demand for flexible PVC.
