Disposable Blood Pressure Cuffs Market Growth & Trends

The global disposable blood pressure cuffs market size is anticipated to reach USD 1.56 billion by 2030, growing at a CAGR of 12.02% from 2022 to 2030, according to a new report by Grand View Research, Inc. The growing global geriatric population base is expected to widen the consumer base using BP monitors by triggering incidence rates of hypertension thereby boosting the demand for disposable blood pressure (BP) cuffs during the forecast period.

The outbreak of COVID-19 has positively impacted the market growth owing to the increased focus on routine checkups amongst the general population as well as the patient pool suffering from COVID-19. In addition, the need to control the spread of COVID-19 infection and reduce the cross-contamination in healthcare facilities are anticipated to create huge growth opportunities for market players during the forecast period.

Moreover, the demand for disposable BP cuffs is high due to the growing geriatric population and increasing obese population as well as the growing adoption of a sedentary lifestyle. According to World Health Organization (WHO), around 1.13 billion people globally suffer from hypertension, and it is also responsible for 7.6 million deaths

annually. This has led to an upsurge in the usage rates of disposable BP cuffs during the forecast period.

Disposable Blood Pressure Cuffs Market Report Highlights

Based on call point, the physicians segment accounted for the largest market share of 45.52% in 2021. Physicians most commonly use BP cuffs, as a walk-in percentage of patients is greater in stand-alone clinics as compared to surgical hospitals.

The clinician's segment is presumed to witness exponential growth throughout the forecast period owing to the rising significance of disposable BP cuffs in outpatient monitoring.

Based on product type, the adult disposables BP cuffs segment accounted for the largest market share of 45.52% in 2021. The growing burden of hypertension globally leads to an increase in the demand for adult disposables BP cuffs.

The market in North America dominated with around 36.21% market share in 2021 owing to the higher level of awareness pertaining to the benefits of disposable BP cuffs amongst healthcare professionals, new product launches along with the high risk of hypertension.

Asia Pacific is expected to grow at a rapid pace during the forecast owing to the presence of untapped opportunities, increasing investments by manufacturers, as well as growing awareness levels
