Abstracts

The global endobronchial ultrasound biopsy scopes market size was valued at USD 26.8 million in 2025 and is projected to grow from USD 28.8 million in 2026 to USD 40.7 million by 2033, growing at a CAGR of 5.1% from 2026 to 2033. North America dominated the market in 2025, with a revenue share of 34.1%. This growth is attributed to the rising incidence of lung cancer and respiratory disorders, increased innovation in EBUS bronchoscopes, shift toward minimally invasive diagnostics, government-led lung cancer screening programs, and increasing replacement of conventional bronchoscopes with advanced EBUS scopes.
