Abstracts

The Europe veterinary vitamin manufacturing market size was valued at USD 310.3 million in 2025 and is projected to grow from USD 324.5 million in 2026 to USD 568.4 million by 2033, at a CAGR of 8.3% from 2026 to 2033. The market growth is driven by the region's well-established livestock and poultry industries, increasing focus on preventive animal healthcare, rising companion animal ownership, and growing demand for high-quality feed-grade vitamins and premixes.

Some of the other factors contributing to the market growth include advanced animal feed manufacturing infrastructure, stringent EU regulations concerning animal nutrition, welfare, and food safety, increasing antimicrobial stewardship efforts, higher spending on companion animal health and nutrition, and the strong presence of established animal nutrition, veterinary health, and specialty feed ingredient manufacturers. Such factors are expected to support the growth of the veterinary vitamin manufacturing market across Europe.
